PERFORMANCE MEDIA FILTER

PLUG & PLAY

AUSTRALIAN DESIGNED & MADE

HEALTH & WELLBEING

- Premium 10 lateral under drain design
- Fully injection moulded
- Suitable for variable speed pumps
- Unique Lock ring
- Compact size

CA MEDIA FILTER

AstralPool's CA Media Filter is 100% designed and made in Australia from the most advanced injection moulding and assembly process of any filter. Engineered and designed for high strength, long life, optimal flow rates and easy installation and service the CA Media filter range provides the best value for money and is designed for tough Australian conditions.

CRYSTAL CLEAR

The AstralPool CA Media Filter produces crystal clear water using fine sand or recycled crushed glass media as the filter medium. Each filter incorporates an engineered multiport valve to direct the water flow and minimise the resistance through the filter, making the CA Media Filter ideal for today's energy efficient high performance pumps.

FILTER BREAKTHROUGH

The CA range represents the largest investment in design and production for any residential filter range using high quality hardened steel tooling to produce high tolerance, high strength tanks which provide the longest trouble free life available. This high tolerance enables the screw on lock ring to secure the multiport valve along with self sealing barrel unions which enable fast, simple installation, easy service and access to the filter media in future years.

SUITED FOR YOU

The CA range is available in 4 models complete with 6 way multiport valve, pressure gauge and air release, barrel unions and backwash sight glass. AstralPool CA Media Filters are perfect to combine with Viron Glass filter media for clean, healthy and sparkling pool water.

WARRANTY

For product warranty registration & information on warranty details.
